

# Asta Powerproject Multi-User

## MULTI-USER CONSTRUCTION PROJECT MANAGEMENT SOFTWARE

“ Using Asta Powerproject not only made the job of scheduling a much easier process but also meant we could consult more easily with the local council and communicate our plans to all stakeholders ”

Rob Owen, Mace Director, on using Asta Powerproject on The Shard project.

## Multi-User Construction Project Management Software

### Asta Powerproject Multi-User is a powerful project management software solution designed for larger construction projects.

It combines Asta Powerproject, professional project management software for construction, with a central database that holds all project information and allows multiple users access to a single project plan.

Asta Powerproject Multi-User also provides quick and easy progress reporting from site, together with customised reports on any aspect of the project.

#### ► WHY CHOOSE ASTA POWERPROJECT MULTI-USER

With Asta Powerproject Multi-User you can:

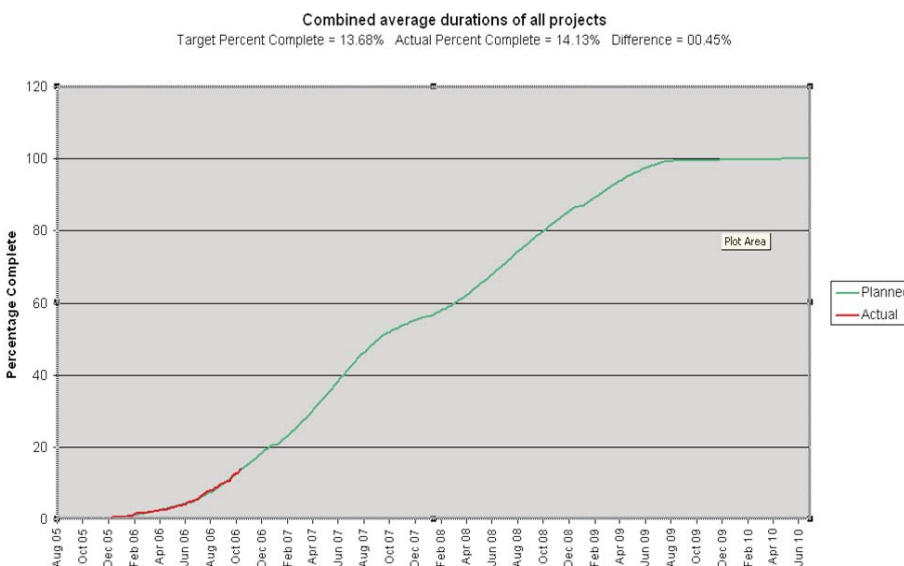

- Enable a number of people to access and work on the same project plan at the same time.
- Collect data from multiple sites quickly and easily and then input it directly into the project plan.
- Provide your clients and senior management with access to reports tailored to their requirements based on accurate, up-to-date data.

#### ► WHO IS IT FOR?

Asta Powerproject Multi-User is ideal for any construction project where a number of people need to access and update a central plan.

Examples include:

- PFI/ PPP projects.
- Large build programmes which employ more than one planner.
- Projects spread across multiple sites.
- Multi-site refurbishment programmes.

S-curve progress report

“Asta Powerproject has proved to be an excellent tool for this particular project because of its ability to produce fully integrated, logic-linked programmes of several thousand activities that are easy to understand backed-up with cost and resource data as required.”

Bob Davis, Senior Planning Manager, Carillion plc

New Library of Birmingham. This impressive building in Centenary Square was constructed by Carillion plc, one of the UK's leading support services and construction companies. Work was planned and managed using Asta Powerproject Multi-User. The library is due to open in September 2013.

“With so many projects of varying sizes to manage, we use Asta Powerproject Multi-User throughout. It helps us foresee upcoming hurdles and although it can't fix the problem, it helps us to manage it and sometimes prevent it.”

Gavin Clegg  
North Midland  
Construction

## A Modular Solution

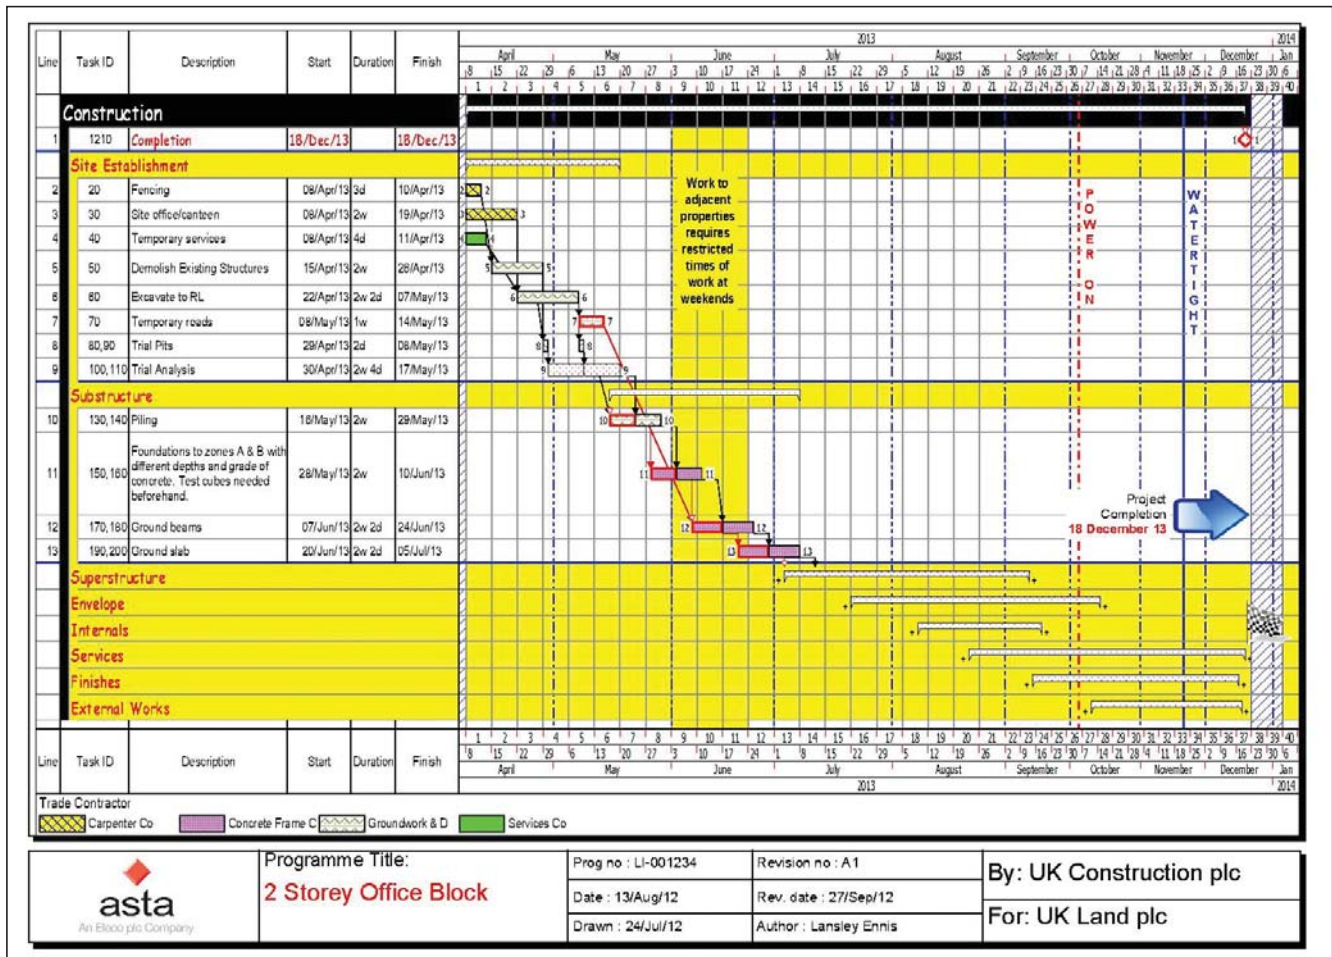

Asta Powerproject Multi-User is a modular solution. Asta Powerproject, the Central Database and Business Intelligence are core elements of the solution. Additional modules including Site Progress can be added at any time.

**Asta Powerproject.** Professional project management software for creating, managing and controlling projects. Specifically designed for construction, Asta Powerproject is one of the easiest, most intuitive project management software tools around with over 60,000 users worldwide.

**Central Database.** Hosted on SQL or Oracle, the central database holds all project information. By storing the data centrally you enjoy much greater visibility of projects and programmes than is possible with a standalone or network version of Asta Powerproject.

**Business Intelligence.** A flexible system which allows you to generate high-quality dashboard reports for senior-level review of complex or multiple projects. These dashboard reports are ideal for providing management and clients with accurate, up-to-date information on any aspect of the project.

**Site Progress.** A quick and easy way for Site Managers and Planners to report progress back into the project using a PDA or web browser. Progress check-lists are provided in the order that users walk round the site. The progress information is then imported directly back into the central Asta Powerproject plan, saving time and eliminating data entry errors.

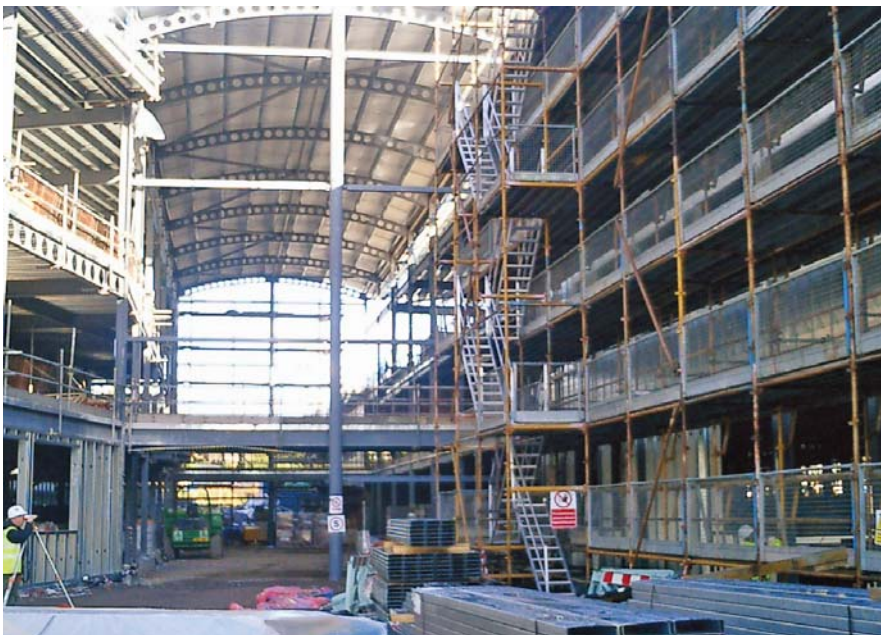

Sample Asta Powerproject plan

“We had not come across Asta Powerproject before and were assessing a couple of other tools including Primavera and MS Project. When we first saw Asta Powerproject it looked a good tool straightaway which was quite exciting.”

Matt O'Grady,  
Program Manager, Hansen Yuncken

### Asta Development Is The Leading Supplier of Construction Project Management Software

- ▶ Our software solutions are designed by construction professionals for construction professionals.
- ▶ Our software development programme is driven by regular customer input and feedback.
- ▶ In addition to software our in-house experts also provide a comprehensive range of support services, including training and technical support.

'The Street' at Lesmahagow High School, part of the AMEC-led joint venture project that used Asta Powerproject Multi-User to deliver 17 new and 2 refurbished secondary schools in South Lanarkshire.
