Powerproject®

Site Progress Mobile *for Powerproject*

### Record project progress quickly and easily via mobile devices

Flexible site-to-office progress reporting that enables you to:

- ◆ Improve data accuracy by removing the need for re-keying of updates
- ◆ Export tasks to mobile devices based on resource assignments
- ◆ Record actual start/finish dates, percentage complete & remaining duration
- ◆ Update progress at any time, from any location – without having to open Powerproject
- ◆ Review reported progress and approve/reject submission, before applying to programme
- ◆ Add notes and photographs to each task update

Site Progress Mobile is a downloadable app which enables mobile users to record the progress of tasks and repetitive events from a remote location against their work as scheduled in an Powerproject project plan.

Each user sees only the relevant tasks and progress check lists for which they have responsibility.

> **❝ Site Progress Mobile significantly reduces the time that progress updates take. ❞**
> *Matthew Kingston, Brown & Carroll*

> **❝ The app has been easy to use. ❞**
> *David Grant, Major Projects Team, Balfour Beatty*

Download the app for FREE

The Site Progress Mobile app is free to install, with the use of the service charged according to the number of active jobs exported to the secure cloud storage area

For Android, Apple (iOS) or Windows Phone.
Site Progress can also be accessed via the web

Google play | Download for Windows Phone | Available on the App Store

Powerproject: The power behind successful projects

How the reporting process works

1. EXPORT

Powerproject user choses which mobile user will update which tasks, based on resource assignments or project structure. Task list uploaded to cloud.

2. RECORD PROGRESS

Mobile user donwloads task list and records progress achieved within specified period. Notes and photos added to report.

SITE 1.
SITE 2.

Site Progress Mobile Process

4. IMPORT

Powerproject user downloads report and reviews/approves changes before applying them to the plan.

The project is typically rescheduled and then the process can start again.

3. SUBMIT

Once a user has finished recording progress they submit their changes. Project data classified as 'submitted' will be uploaded to the Cloud when a signal is available.

Administration

We provide hosting for the data in the Cloud.

Site Progress Mobile components are free to install, with use of the service charged according to the number of the number of progress update requests which are sent to mobile users, known as 'jobs'.

The fee covers the software licence and technical support.

The jobs produced are per user and per project. For example, 3 managers may update different parts of the same project and one of these managers may also update another project – this would contribute 4 jobs toward the total.
